NO SUS

Delete Me India

The NO SUS kit: every site that exposes you, the exact route out, and the letters that make a request hard to ignore.

How to use this kit

1. Do the order of operations (section 1) top to bottom. Stop the leak at the source first.
2. Each item is marked Instant, Request or No route. Do the Instant ones in one evening.
3. For every Request, send letter 7 and note the date. Letter 8 is for sites that ignore you.
4. Recheck monthly with sheet 10. Caller-ID names come back.

Inside

1. Delete Me India: the order of operations
2. Part 1. Truecaller and caller-ID apps
3. Part 2. Google removal
4. Part 3. Facebook, Instagram, Threads
5. Part 4. Marketplaces and directories
6. Part 5. Jobs and matrimony
7. Part 6. Telecom, DND, Aadhaar, email
8. Part 7. Erasure request template (two versions)
9. Part 8. Escalation when a grievance officer ignores or refuses
10. Part 9. Intimate image removal
11. Part 10. Monthly re-check checklist

Templates and steps, not legal advice. Nothing removes you from the internet completely. nosus.foo

Delete Me India: the order of operations

Last checked: 9 Nov 2026. Portals and rules change, so check each link before you act.

Your phone number, name, photos or address are on sites you never signed up for. Caller-ID apps show your name to strangers. An old resume, a matrimony profile or a Justdial listing still answers to your number. This kit takes them down in the order that stops new leaks first, then clears the big exposers, then the long tail.

Each item in this kit is marked one of three ways:

- **Instant**: you click, it is gone (sometimes after a short processing window).
- **Request**: you ask, the site decides. Keep the acknowledgement and follow up.
- **No route**: the site gives you no way to opt out. The kit tells you what else works.

Step 1. Stop the leak at the source (about 40 minutes)

Do these before anything else. There is no point removing your number from ten sites if a SIM you do not own is still active in your name, or if every app you install can keep sharing your contacts.

1. **SIMs in your name.** Open tafcop.sancharsaathi.gov.in, log in with your number and the OTP, and mark every connection that is not yours "This is not my number". Outgoing stops within 30 days, incoming within 45, disconnection within 60. Part 6.
2. **DND.** Send `START 0` to 1909 (or call 1909). Install the TRAI DND 3.0 app so you can report every spam call that still comes. Part 6.
3. **Aadhaar.** On myaadhaar.uidai.gov.in: lock biometrics, generate a VID and use it instead of your Aadhaar number, and read the authentication history. Part 6.
4. **Your own phone.** In Android or iOS settings, remove contacts access from every app that does not need it (caller-ID, "who viewed my profile", lending, shopping). Each of those uploads your friends' numbers, and your friends' apps upload yours.

Step 2. Caller-ID apps (20 minutes, then a 24-hour wait)

Truecaller is why a stranger sees your name when you call. Unlist at truecaller.com/unlisting (up to 24 hours, Instant). Then Getcontact, Eyecon and the rest. Part 1.

Step 3. Google (about 1 hour)

Search your name, your number and your email in quotes. Save every bad result's URL. Then use Results about you for phone, address and email, and the content removal form for ID numbers, bank details and photos of documents. Fix Maps reviews and photos. Part 2.

Google removes a result from Search, not from the source site. The source site is Steps 4 to 6 and the erasure request in Part 7.

Step 4. Facebook, Instagram, Threads (about 1 hour)

Download your data first, then delete or lock down. Find old accounts you forgot. Report photos of you that other people posted. Part 3.

Step 5. Directories and marketplaces (about 1 hour)

Justdial, Sulekha, IndiaMART, OLX, Quikr, and delivery-partner profiles on Zomato or Swiggy. Some are a settings toggle; some need an email. Part 4.

Step 6. Jobs and matrimony (about 30 minutes)

Old resumes on Naukri, Shine, foundit. Old profiles on Shaadi, BharatMatrimony, Jeevansathi. These carry your photo, date of birth, salary, family details and address. Part 5.

Step 7. Email and passwords (about 45 minutes)

Check your email and number on haveibeenpwned.com. List every site you signed into with Google or Apple and close the ones you do not use. Search your inbox for "welcome to" and "verify your email" to find the rest. Part 6.

Step 8. Send erasure requests for what is left (15 minutes each, then wait)

For every site that has no button, send the Part 7 template to its grievance officer. Today the request stands on the site's own privacy policy and the IT Rules 2021 (grievance reply within 7 days, acknowledgement within 24 hours). From the day the DPDP Act's duties commence (reported as 13 May 2027; verify), use the second version of the template, which cites section 12 of the Act.

Step 9. Escalate what is refused or ignored (Part 8)

Seven days with no reply, or a refusal with no reason? Part 8 has the escalation letter and the list of who to send it to. Intimate images have their own fast track in Part 9: a 2-hour removal clock under the IT Rules as amended in February 2026, StopNCII.org, and cybercrime.gov.in.

Step 10. Re-check monthly (20 minutes)

Your number gets re-uploaded by other people's phones. Part 10 is the checklist to run on the first of every month.

What this kit cannot do

- It cannot delete data a site refuses to delete. Before the DPDP duties commence, erasure is a request, not a right you can enforce. The kit tells you which route is a request and which is a button.
- It cannot stop a friend's phone from re-uploading your number to a caller-ID app. Monthly re-checks catch it.
- It cannot remove you from government records, court records, news sites or educational sites. Google says it will not remove those either.

- It cannot find who leaked your data.

Time and cost

About 6 hours of work spread over a week, then 20 minutes a month. Everything in this kit is free to do. You never need to pay a "data removal service" for Indian sites: most of them send the same emails this kit gives you.

Templates and steps, not legal advice.

Part 1. Truecaller and caller-ID apps

Caller-ID apps build their database from other people's address books. If one friend saved you as "Rahul Plumber" and installed the app, that is the name strangers see. Unlisting removes you from the app's search; it does not stop the next upload. Do this part, then re-check monthly (Part 10).

Summary

App	Route	Type	Time
Truecaller	truecaller.com/unlisting	Instant	Up to 24 hours
Getcontact	getcontact.com/en/unlist	Instant	Reported as about 24 hours
Eyecon	Email support@eyecon-app.com	Request	Not stated
Sync.me	sync.me/unsubscribe (built for US numbers)	No route for India	
"Whose number", "caller ID lookup" sites	None	No route	Use Google removal, Part 2

Truecaller

If you have the app installed:

1. Open Truecaller. Settings > Privacy Center > Deactivate. This closes your account. Your profile is otherwise still live even after you uninstall.
2. Uninstall the app.

Then, with or without the app:

3. Open **truecaller.com/unlisting**. Enter your number with the country code (+91XXXXXXXXXX), pass the captcha, press Unlist.
4. Truecaller's page says it can take up to 24 hours before the number is removed, and that unlisting cannot be reversed.
5. After 24 hours, ask a friend who has Truecaller to search your number. If your name still shows, submit again and keep a screenshot.

The catch: Truecaller's own page lists what you lose (people will not see your name when you call, no spam protection). It does not promise that the number stays unlisted forever. Third-party guides and user reports say a number can reappear when someone who has you saved installs or re-syncs the app, or if you reinstall it yourself. Treat unlisting as a monthly check, not a one-time fix.

If the name shown is wrong or defamatory (not just your real name), also write to Truecaller's grievance officer for India. The contact sits in the privacy policy at truecaller.com/privacy-policy under "Grievance". Use the Part 7 template.

Getcontact

1. Open **getcontact.com/en/unlist** in a browser (the form loads only with scripts on; it did not render in a plain fetch on 9 Nov 2026, so check it in a normal browser).
2. Enter your number. Reports say it verifies with an SMS code. Confirm.
3. Reports say removal takes about 24 hours. Re-check through a friend's app.

If you have the app: Settings > Privacy, turn off visibility in search, then delete the account, then unlist.

Eyecon

Eyecon's FAQ (eyecon-app.com/faq) says that if you do not have the app, email support and give your phone number including the country code, and they will delete your information. The address reported by removal guides is **support@eyecon-app.com**. Mark this Request: you get no confirmation screen. Save the sent email.

Template email, fill every [bracket]:

Subject: Remove my number [+91XXXXXXXXXX] from Eyecon

I do not use Eyecon. My number [+91XXXXXXXXXX] appears in your app with the name "[name shown]". Please delete my number and every name, photo and tag linked to it from your database, and confirm by reply to this email.

[Your name] [Date]

Sync.me

Sync.me has an opt-out form at sync.me/unsubscribe, but on 9 Nov 2026 it was a US form (phone field fixed to +1, filed under a US state law). For an Indian number there is **no route** on the site. If your number shows there, use the Google removal in Part 2 so the page stops ranking for your name or number, and send the Part 7 template to the privacy contact in sync.me's privacy policy.

"Whose number", "who called me", "caller ID lookup" sites

Dozens of small sites list Indian numbers with user comments ("loan agent", "spam"). Most have no contact page, no opt-out and no company name. **No route.** What works:

- The Google personal-info removal (Part 2) takes the page out of results for your number.
- If the page shows your name next to the number, also send the Google content removal form with "my phone number" as the type.
- Do not post on the page to "correct" it. That adds a comment with your words next to your number.

Your own phone

Android: Settings > Security and privacy > Permission manager > Contacts. iOS: Settings > Privacy and Security > Contacts. Remove every app that does not need your contacts. Each app with contacts access can upload your friends' numbers; their apps upload yours.

Templates and steps, not legal advice.

Part 2. Google removal

Google does not host the page. It shows it. Removing a result hides the page from Search for your name or number; the page itself stays up until the site deletes it (Parts 4 to 7). Do Google early anyway: for most people, Search is how a stranger finds the page.

Summary

What	Route	Type	Time
Phone, home address, email in results	myactivity.google.com/results-about-you	Request (Google decides)	Days to weeks
ID numbers, bank or card numbers, signature or ID photos, medical records, passwords	support.google.com/websearch/contact/content_removal_form	Request	Days to weeks
Page already deleted but still in results	search.google.com/search-console/remove-outdated-content	Instant (after Google re-crawls)	Hours to days
Intimate images of you	support.google.com/websearch/answer/13650142	Request (priority)	Days
Your own Maps review or photo	Maps > Your contributions	Instant	
Someone else's Maps photo of you or your home	Photo > More > Report a problem	Request	Days
Your house on Street View	Street View image > Report a problem > blur "My home"	Request, permanent once done	Days to weeks
Apps you signed into with Google	myaccount.google.com/connections	Instant	

Step 1. Find what Google shows

Search each of these in quotes, in an incognito window: "[your full name]", "[your number]", "[your number without +91]", "[your email]", "[your name] [your city]". Also search Google Images for your name. Save every URL you want gone in a note with the date.

Step 2. Results about you

1. Open **myactivity.google.com/results-about-you** (or the Google app > profile picture > Results about you). Google's help page lists it for users over 18 "in certain markets"; third-party lists include India. If the page refuses, skip to Step 3, which works everywhere.
2. Enter your name, phone numbers, home address and emails. Nicknames and maiden names help matching.
3. Google scans and shows matches under "To review". For each, choose **Request to remove**.
4. Turn on alerts so new matches notify you.
5. Track status under "Removal requests": in progress, approved, denied, undone.

Same thing from a search result: More (three dots) > Remove result > "It shows my personal info and I don't want it there" > Contact info.

Step 3. Content removal form (everything else)

Open **support.google.com/websearch/contact/content_removal_form** and choose the problem. Google's personal-info policy (support.google.com/websearch/answer/9673730) says it removes, on request:

- address, phone number or email
- confidential government ID numbers (Aadhaar, PAN, passport, voter ID fall here as resident ID or tax ID numbers)
- bank account or credit card numbers
- pictures of your signature or ID document
- private records such as medical records
- confidential usernames and passwords

Google may keep a result that is "newsworthy" or on a government, educational or news site. It removes only the exact URLs you submit. Submit one request per URL.

Wording that works in the description box:

> This page shows my [phone number / home address / Aadhaar number / PAN], which identifies me. I did not publish it and have not consented. The page is a [caller-ID lookup / directory / forum] with no public-interest purpose. Please remove it for searches of my name and my number.

Step 4. Outdated content

When a site has already deleted your profile but Google still shows it, open **search.google.com/search-console/remove-outdated-content**, paste the URL, Request refresh. For a photo, copy its link from images.google.com and use New request > Image. Check status at google.com/webmasters/tools/removals.

Step 5. Google Maps

- **Your own review or photo:** Maps > Menu > Your contributions > Reviews or Photos > More > Delete. Google's page says deleted photo updates also disappear from Search.
- **Someone else's photo of you, your shop front with your number, or your home:** open the photo, More > Report a problem, pick the reason. Request.
- **Your house on Street View:** on a computer, open the Street View image of your home, click "Report a problem" at bottom right, draw the box, choose "My home". Google's page says only the owner or tenant may ask, and the blur is permanent.
- **Your business profile shows your personal mobile:** sign in at business.google.com and change or remove the number. If you no longer own the business, use "Suggest an edit" on the listing and report it as closed.

Step 6. Your Google account itself

- **myaccount.google.com/connections**: every app and site where you used "Sign in with Google". Delete the connection for each one you do not use. Google's page notes this does not delete the data the app already has; write to the app (Part 7).
- **myaccount.google.com/data-and-privacy**: turn off Web and App Activity, Location History (Timeline) and YouTube History if you do not want them kept.
- **takeout.google.com** if you want a copy before deleting anything.

What Google will not do

- Remove news articles, court records, government pages or school pages because your name is in them.
- Remove a page that only says your name with nothing else private on it.
- Delete the page from the internet. That is the site's job, and Part 7 is how you ask.

Templates and steps, not legal advice.

Part 3. Facebook, Instagram, Threads

Three jobs here: get a copy of your data, then delete or lock each account, then remove photos of you that other people posted. Meta's own paths are below as they appeared on 9 Nov 2026; menu names move, so read the screen.

Summary

What	Route	Type	Time
Copy of your Facebook or Instagram data	Accounts Center > Your information and permissions > Export your information	Instant (file arrives later)	Minutes to a day
Delete Facebook profile	Accounts Center > Personal details > Account ownership and control > Deactivation or deletion	Instant, 30-day cancel window	Up to 90 days to purge
Delete Instagram	Same Accounts Center path, pick the Instagram profile	Instant, 30-day window	Up to 90 days
Delete Threads only	Threads > Settings > Account > Delete or deactivate profile	Instant	30 days
Old Facebook account you cannot log in to	facebook.com/login/identify	Request (recovery)	Minutes to days
Photo or video of you posted by someone else (Facebook)	facebook.com/help/327689333983073 > the form	Request	Days
Photo or video of you posted by someone else (Instagram)	In-app Report > It's inappropriate > then the privacy option; or the privacy-rights form in Help	Request	Days
Intimate image	Part 9	Request, 2-hour legal clock	Hours

Step 1. Export your data first

Facebook: profile picture > Settings & privacy > Settings > Accounts Center > Your information and permissions > Export your information > Create export > choose the profile > export to device > pick date range, HTML or JSON, media quality > Start export. Instagram is the same screen; choose the Instagram profile. Deletion cannot be undone after the 30-day window, and you lose photos, messages and the list of pages you follow.

Step 2. Decide: delete or lock down

Delete if you do not use it. Lock down if you do.

Delete (Facebook or Instagram): Settings > Accounts Center > Personal details > Account ownership and control > Deactivation or deletion > pick the profile > Delete > Continue. Meta's page says: you can cancel within 30 days by logging in; deletion of everything you posted can take up to 90 days; backup copies may remain after that for legal or disaster-recovery reasons.

Lock down (if you keep it):

- Facebook: Settings > Privacy > "Who can look you up using the phone number you provided?" set to Only me. Same for email. "Do you want search engines outside of Facebook to link to your profile?" set to No. Audience for past posts: Limit past posts.
- Instagram: Settings > Account privacy > Private account. Settings > Accounts Center > Personal details: remove the phone number if you log in with email. Turn off "Allow others to find you by phone number" under contacts syncing.
- Both: Settings > Accounts Center > Your information and permissions > Upload contacts: turn off, and delete uploaded contacts.

Step 3. Threads

Since December 2023 Threads can be deleted alone. Threads app > Settings > Account > Delete or deactivate profile > Delete profile. Meta's help says deleting Threads does not delete Instagram; deactivating Instagram does deactivate Threads. If you had fediverse sharing on, deletion turns it off and asks other servers to delete your posts.

Step 4. Old accounts you forgot

1. Open **facebook.com/login/identify** and enter every old email and old phone number you have had. Facebook shows matching profiles with partly hidden contact info.
2. If you still control that email or number, recover, export, then delete as in Step 2.
3. If you do not, open the profile while logged in to your current account > three dots > Find support or report profile > "Something else" > "Recover this account" (this logs you out of the current one), or report it as pretending to be you. Request. Meta decides.
4. Instagram: instagram.com/accounts/password/reset with each old email or username.

Step 5. Photos of you posted by others

Facebook. Open **facebook.com/help/327689333983073** ("Report a photo or video that violates my privacy"). It offers Remove Tag (only unlinks you; the photo stays), Report under Community Standards, or a privacy request form. Fill the form with the photo's URL and the sentence "This photo shows me. I did not consent to it being posted. Please remove it." Facebook says it reviews against its Community Standards and can remove only in specific circumstances, so this is a Request.

Ask the poster too, in writing, with a date. Keep the message. If they refuse, the message is your proof for Part 8.

Instagram. On the post: three dots > Report > It's inappropriate > then the option for your privacy or your image being used without permission (wording changes; pick the closest). Instagram's Help Center also has a form titled "Report a Photo or Video for a Violation of Your Privacy Rights on Instagram". The copy of it that was reachable on 9 Nov 2026 (help.instagram.com/contact/1024543072377373) is written for minors and says it needs the post URL. Search the Help Center for the title if you are an adult.

If you took the photo yourself (a selfie someone reposted), a copyright report is faster than a privacy one: help.instagram.com/contact/552695131608132 (Instagram) and the copyright form in Facebook's Help. Only use it for photos you actually took.

Intimate images: Part 9, not this page.

Step 6. Other social

- **X (Twitter):** Settings > Your account > Deactivate. Thirty days, then deleted. Settings > Privacy and safety > Discoverability: turn off "Let people find you by phone/email".
- **LinkedIn:** Settings > Account preferences > Close account. Settings > Visibility > Edit your public profile: turn off public visibility if you keep it.
- **Snapchat, Telegram, WhatsApp:** Telegram Settings > Privacy > Phone number: "Nobody", and "Who can find me by my number": My contacts. WhatsApp Settings > Privacy: profile photo, about and last seen to My contacts or Nobody. Snapchat: Settings > Mobile number, turn off "Let others find me using my mobile number".

Templates and steps, not legal advice.

Part 4. Marketplaces and directories

Directories sell your number to "vendors". Marketplace ads keep your number public long after the sofa is sold. Delivery-partner profiles carry your photo, Aadhaar-verified name and vehicle number. Routes below as of 9 Nov 2026.

Summary

Site	Route	Type	Time
Justdial (personal profile)	justdial.com/cms/opt-out-request; privacy@justdial.com	Request	Policy says 2 business days
Justdial (business listing with your number)	Same form plus email; say "business listing"	Request	Not stated
Sulekha	Dashboard has no delete; email support	Request	Not stated
IndiaMART	Dashboard > Settings > Privacy Settings > Disable account	Instant, permanent	Immediate
OLX	App > Settings > "Deactivate account and delete my data"	Instant (reported)	Immediate
Quikr	No in-app delete; email customer care from your registered email	Request	Not stated
Zomato delivery partner	No self-serve delete found; partner app Help, then grievance officer	Request	Not stated
Swiggy delivery partner	Same	Request	Not stated
Dunzo	Company stopped operating in 2025 (not re-checked); write to the grievance contact in its last privacy policy if a listing still shows	Request	

Justdial

Justdial lists people as well as businesses. Search your number on justdial.com first and save the listing URL.

1. Open **justdial.com/cms/opt-out-request**. Mandatory fields seen in the indexed form: City, Name, Mobile Number. Email is optional. Fill it, submit, screenshot the confirmation.
2. Same day, email **privacy@justdial.com** with the Part 7 template. Put the listing URL and "Opt-out request submitted on [date]" in the first line.
3. Justdial's policy language says personal profile data is permanently deleted within two business days of the request. It gives no timeline for a business listing. Re-check on day 3 and day 10.

4. If the listing is a business you once ran, also say "the business has closed; remove the listing and the phone number". Justdial has refused in the past when it thinks the business still runs; a GST cancellation or shop closure proof helps.

No reply in 7 days: Part 8 escalation. Justdial's grievance officer is named in justdial.com/privacy.

Sulekha

Sulekha's dashboard (sulekha.com, sign in with your number > your name at top right > My dashboard) lets you cancel service requests and unsubscribe from alerts but, as of the last customer-care replies seen, has no delete-account button. Request:

1. Unsubscribe from every alert in the dashboard.
2. Email the support address shown on sulekha.com's Contact page and the grievance officer in its privacy policy with the Part 7 template. Ask for deletion of the account, the number and every lead shared with vendors.
3. Sulekha's business is sharing your "lead" with several vendors. The vendors already have your number; the template asks Sulekha to tell them to delete it, which it may not do. Expect calls to fade over weeks, not stop.

IndiaMART

Instant. IndiaMART's help page (help.indiamart.com/knowledge-base/deactivate-my-account):

1. Sign in to the Dashboard with your mobile number and OTP.
2. Profile > Settings (or hamburger menu > Settings).
3. Under Privacy Settings, choose the disable-account option (also in the three-dot menu at top right of Settings).
4. Confirm, pick a reason, submit, confirm again.

IndiaMART says the account is permanently closed and cannot be restored. If you had a paid plan with NACH auto-debit, cancel it through the Complaint Form or your account manager first. Help line 09696969696, customercare@indiamart.com.

OLX

Reported route (third-party guides, not OLX's own help page): OLX app > profile > Settings > "Deactivate account and delete my data". It is permanent and removes every active ad. Before that, open each live ad and delete it, since ad pages are what Google indexes. Mark Instant but confirm the menu on your screen.

Quikr

No delete option in the app or site. Email Quikr customer care from the email address registered to your account, asking for deletion of the account, all ads and your number. Guides say Quikr replies asking you to confirm. Request. Delete every live ad yourself first, because ad pages stay cached.

Zomato and Swiggy delivery-partner profiles

Delivery-partner apps (Zomato Delivery Partner, Swiggy Partner) hold your photo, name, bank account, vehicle number and ID documents. No self-serve "delete account" was found for either on 9 Nov 2026; both privacy pages did not load in a plain fetch, so confirm the grievance contact on zomato.com/privacy and swiggy.com/privacy-policy before writing.

1. In the partner app, Help or Support > raise a ticket: "I have stopped working with you. Please deactivate my partner ID and delete my personal data, documents and photo." Save the ticket number.
2. Email the grievance officer named in the privacy policy with the Part 7 template and the ticket number.
3. Payment and tax records (TDS, payouts) will be kept for the period tax law requires. The template already allows for that. Ask specifically for the photo, ID document copies and contact number to be deleted.

Request. Expect a reply in 7 days under the IT Rules; Part 8 if not.

Other listings worth a search

- **Google Business Profile** with your personal number: Part 2, Step 5.
- **Sulekha-style lead sites** (UrbanClap/Urban Company partner, Housing.com, 99acres, MagicBricks owner listings): each has an in-app delete or a grievance email in its privacy policy. Delete live listings first, then send Part 7.
- **Yellow Pages scrapes** (indiayellowpages, cityinfo-style sites): usually No route. Use Part 2 to remove from Search.

Templates and steps, not legal advice.

Part 5. Jobs and matrimony

A resume carries your number, email, address, date of birth, college and salary. A matrimony profile adds your photos, height, family income and religion. These two kinds of profiles leak more about you than anything else you own. Routes as of 9 Nov 2026.

Summary

Site	Route	Type	Time
Naukri	App > profile > Settings > Delete account (password needed)	Instant, permanent	Immediate
Shine.com	No official delete page found; write to support and the grievance officer	Request (not verified)	Not stated
foundit (ex-Monster India)	No official delete page found; write to support and the grievance officer	Request (not verified)	Not stated
Shaadi.com	Menu next to My Shaadi > Account Settings > Hide/Delete Profile	Instant, permanent	Mailers stop within 48 hours
BharatMatrimony	Settings > Profile Settings > Delete Profile (reported); else email	Instant (reported) / Request	Not stated
Jeevansathi	Delete profile on the site; help@jeevansathi.com for the rest	Instant	Not stated
LinkedIn	Settings > Account preferences > Close account	Instant	Days

Naukri

Instant. Naukri's FAQ (naukri.com/faq, "How can I delete my Naukri account?"):

1. Open the Naukri app, sign in.
2. Profile > Settings > Delete account (menu names vary by version; the FAQ says it is under account settings).
3. Choose a reason, enter your password, confirm.

Naukri says the account is deleted permanently and you cannot create another with the same email. Download your resume first. If you only want to stop recruiter calls, Settings > Communication: turn off recruiter calls and SMS, and set the profile to not visible to recruiters. Deactivation (until next login) is the middle option.

Shine.com

No official delete-account help page was found (a help page that appears in search for "shine delete account" belongs to a different company, Shine the German bank). Request:

1. Sign in at shine.com, open your profile, and delete the resume file, phone number and address fields yourself. Set profile visibility to off if the option is shown.
2. Email the support address on shine.com's Contact Us page and the grievance officer in its privacy policy with the Part 7 template.
3. Not verified: whether Shine deletes on request or only deactivates. Keep the sent email for Part 8.

foundit (formerly Monster India)

Same situation as Shine: no official page found. Delete the resume and contact fields in the account, set the profile to private, then send Part 7 to the grievance officer named in foundit.in's privacy policy. Request, not verified.

Shaadi.com

Instant. Shaadi's support article (support.shaadi.com, "I want to hide or delete my profile"):

1. Open the app or mobile site. Home > menu icon next to "My Shaadi".
2. Scroll to the bottom > Account Settings > Hide/Delete Profile.
3. Choose Delete. Shaadi says the profile, photos and any Premium membership are permanently deleted, and mailers stop within 48 hours.

Hide instead of delete only if you may come back: a hidden profile is invisible to members for up to 30 days and you can unhide any time. A paid plan keeps running while hidden.

BharatMatrimony (and the other Matrimony.com sites)

Reported route: Settings > Profile Settings > Delete Profile, then enter your password. One guide says only deactivation is offered. Mark Instant but check your screen; if there is no delete, email the customer care and grievance officer addresses on bharatmatrimony.com with the Part 7 template. Request in that case. Download your photos first.

Jeevansathi

Instant. Jeevansathi's privacy policy says you delete your data by deleting your profile on the platform, with instructions at jeevansathi.com/help/index. For anything else (confirm deletion, remove a photo they still hold, correct data), write to the grievance officer: Info Edge (India) Ltd, help@jeevansathi.com, with proof of identity. Part 7 template.

LinkedIn

Settings & Privacy > Account preferences > Account management > Close account. If you keep it: Visibility > Edit your public profile > turn off "Your profile's public visibility", and Visibility > "Who can see or download your email address" to 1st-degree connections only. Remove your phone number from the contact info panel.

What a job or matrimony site may keep

Payment records for a paid plan, and logs tax law or the IT Rules require, are kept even after deletion. That is normal. Your photos, resume file, date of birth and family details are not required by any law, and the Part 7 template names them.

Before you delete

- Download the resume or the photos you want.
- Note the profile ID: it goes in the Part 7 email if you have to chase.
- Take one screenshot of the profile as it looked, with the date. That is your proof it existed if it reappears.

Templates and steps, not legal advice.

Part 6. Telecom, DND, Aadhaar, email

This is Step 1 of the kit for a reason. A SIM in your name you did not buy, a telemarketer list you never left, an Aadhaar that answers to anyone's fingerprint scanner: fix these first, or the rest of the kit leaks again. Everything here is a government portal and free.

Summary

What	Route	Type	Time
SIMs issued on your ID	tafcop.sancharsaathi.gov.in > "This is not my number"	Instant to report; carrier re-verifies	Outgoing off within 30 days, incoming 45, disconnected 60
Stop telemarketing	SMS START 0 to 1909, or call 1909, or TRAI DND 3.0 app	Instant to register	Carriers quote 24 hours to 7 days
Report a spam call or SMS	TRAI DND 3.0 app; Sanchar Saathi Chakshu (UCC)	Request (complaint)	Report within 7 days for action
Report a fraud call or SMS	Sanchar Saathi Chakshu (fraud)	Request	Report within 30 days
Lock Aadhaar biometrics	myaadhaar.uidai.gov.in or mAadhaar app	Instant	Immediate
Use a VID instead of the Aadhaar number	myaadhaar.uidai.gov.in > Generate VID	Instant	Immediate
See who verified your Aadhaar	myaadhaar.uidai.gov.in > Authentication History	Instant	Last 6 months
DigiLocker account	No self-serve delete; support@digilocker.gov.in	Request	Not stated
Breached passwords	haveibeenpwned.com	Instant check	
Sites you joined with Google	myaccount.google.com/connections	Instant	
Sites you joined with Apple	appleid.apple.com > Sign-In and Security > Sign in with Apple	Instant	

SIMs in your name (TAFCOP)

1. Open **tafcop.sancharsaathi.gov.in**. Enter your mobile number, the captcha, then the OTP.
2. You see every mobile connection issued on your identity document.
3. For each one that is not yours, choose "This is not my number" and Report. For a number that was yours but you no longer use, choose "Not required".

4. Sanchar Saathi says the carrier re-verifies: outgoing is suspended within 30 days, incoming within 45, and a connection that fails re-verification is disconnected within 60 days. Write down the reference number and re-check on day 30 and day 60.

The Sanchar Saathi mobile app (Play Store and App Store) has the same services.

DND

1. Send `START 0` to **1909** from the SIM you want on the list (0 = block all categories). Or call 1909 and follow the menu. BSNL users: `START DND`. Carriers quote 24 hours to 7 days to take effect; you get an SMS confirmation. `STOP 0` turns it off.
2. Install the **TRAI DND 3.0** app from the Play Store or App Store (publisher: TRAI). Allow calls and SMS access. Register DND from inside it, and report each spam SMS under "Report UCC" and spam calls from the call log. Each report gets a complaint number.
3. DND does not stop calls from companies you gave consent to (your bank, a shop that took your number). Reply to their SMS with the stop keyword, or write to them with the consent-withdrawal line in the Part 7 template.
4. Spam that still comes: report on the TRAI DND app or Sanchar Saathi > Chakshu > Unsolicited Commercial Communication. Sanchar Saathi says complaints within 7 days of the message can lead to action; later ones only help identify the sender.
5. Fraud calls or messages (fake KYC, fake loan, impersonating a bank or a courier): Sanchar Saathi > Chakshu > Report Suspected Fraud Communication, within 30 days. Lost money: 1930 and cybercrime.gov.in, not Chakshu.

Aadhaar

On **myaadhaar.uidai.gov.in** (login: Aadhaar number or VID + OTP on the registered mobile) or in the **mAadhaar** app:

1. **Lock biometrics.** Fingerprint, iris and face authentication then fail everywhere. OTP authentication still works. Unlock for a few minutes when you actually need a fingerprint check (a SIM shop, a bank), then it re-locks.
2. **Generate a VID.** A 16-digit Virtual ID that works in place of your Aadhaar number for verification. Give the VID, not the Aadhaar number, on forms. Generate a new one and the old one stops working.
3. **Authentication history.** Shows the last six months: date, time, the agency that asked, success or failure. An entry you do not recognise means someone used your Aadhaar. Write to that agency (its name is in the entry) with the Part 7 template, and tell UIDAI at help@uidai.gov.in or 1947.
4. **Masked copies.** Never hand over an unmasked Aadhaar photocopy. The free tool at nosus.foo/mask-aadhaar-copy covers the first 8 digits in your browser.

Your registered mobile must work for any of this. If it does not, update it at an Aadhaar centre first.

DigiLocker

DigiLocker has no self-serve delete. Guides and support replies point to **support@digilocker.gov.in**; one notes Aadhaar-linked accounts may not be deleted on request. Request. What you can do yourself: open the app, Issued Documents and Uploaded Documents, delete every document you do not need there (Aadhaar itself cannot be deleted from Issued). Turn on the app lock.

Email and passwords

1. **haveibeenpwned.com**: enter each email you have ever used. It lists breaches the address appears in. Click Notify Me so future breaches email you. The site also has a phone-number search and a password check (Pwned Passwords); the home page on 9 Nov 2026 showed only the email check, so look for those in the menu.
2. Any breached site: change the password, turn on two-factor, and if you do not use it, close the account and send Part 7.
3. **myaccount.google.com/connections**: every site where you pressed "Sign in with Google". For each you do not use: Delete connection. Google's page says the site keeps what you already shared, so send it Part 7 too.
4. **appleid.apple.com** > Sign-In and Security > Sign in with Apple: same list for Apple. Stop using the app, then write to the app for deletion.
5. **Inbox search.** In Gmail search: `"welcome to" OR "verify your email" OR "your account has been created"`. Every hit is a site that has your email. Close the ones you do not use; the site's privacy policy names the grievance officer, and Part 7 is the email.
6. **Password manager.** Put every password you still need into one (Bitwarden is free). Change the ones you reuse. A reused password plus one breach is how old accounts get taken over and your name posted from them.

Templates and steps, not legal advice.

Part 7. Erasure request template (two versions)

Use this for any site that has no delete button, or that kept your data after you pressed it. Send by email to the grievance officer named in the site's privacy policy (search the policy page for "Grievance"). Every intermediary serving Indian users must publish that name and email under the IT Rules 2021. Keep the sent copy. Fill every [bracket]. Delete the box before sending.

Which version to send

- **Version A, today.** The DPDP Act 2023 is law but its duties on companies start 18 months after the Rules were notified on 13 November 2025, reported as 13 May 2027 (check before you cite a date). Until then your request rests on the site's own privacy policy, its terms, the IT Rules 2021 grievance duty (acknowledge within 24 hours, resolve within 7 days since the February 2026 amendment), and the SPDI Rules 2011 right to withdraw consent. It is a request the site may refuse.
- **Version B, after the DPDP duties commence.** Add section 12 (right to correction and erasure) and section 13 (grievance redressal) of the Act. Refusal or silence then has a legal consequence: a complaint to the Data Protection Board.

Both versions ask for the same five things, in the same order, so a site cannot say the request was unclear.

Version A (use today)

Date: [DD Month YYYY]

To, The Grievance Officer [Company legal name, from the privacy policy] Email: [grievance email from the privacy policy]

Subject: Request to delete my personal data and account. [Your name], [your mobile number], [profile or listing URL if any].

Dear Sir or Madam,

1. I am [your full name]. My mobile number is [number] and my email is [email]. Your service holds my personal data at [profile ID / listing URL / "in your caller-ID database" / "as a delivery partner ID [number]"].

2. I withdraw any consent I may have given to collect, store, share or publish this data, under Rule 5(7) of the Information Technology (Reasonable Security Practices and Procedures and Sensitive Personal Data or Information) Rules, 2011, and under your own privacy policy dated [date on the policy page], which says users may [quote the line about deletion or withdrawal of consent].

3. I ask you to: a. Delete my account / profile / listing and every copy of my name, phone number, email, address, photographs, documents and other personal data you hold, except what a law requires you to keep. b. Stop sharing my data with any third party, and tell every

third party you shared it with (vendors, partners, advertisers) to delete it. c. Remove the public page at [URL] so that it returns a "not found" response, and request its removal from search engines. d. Tell me in writing what data you keep after deletion, under which law, and for how long. e. Confirm in writing when each of the above is done.

4. Please acknowledge this complaint within 24 hours and resolve it within 7 days, as Rule 3(2) of the Information Technology (Intermediary Guidelines and Digital Media Ethics Code) Rules, 2021, as amended, requires of your Grievance Officer.

5. If I do not receive a reply, or the reply refuses without reason, I will escalate under Rule 3(2) and to the authorities listed in my escalation notice, and I reserve the right to complain to the Data Protection Board of India once the duties under the Digital Personal Data Protection Act, 2023 commence.

Yours faithfully, [Your name] [Mobile] | [Email]

Attached: screenshot of the page or profile showing my data, dated [date].

Version B (after the DPDP Act's duties commence)

Date: [DD Month YYYY]

To, The Data Protection Officer / Grievance Officer [Company legal name] Email: [DPO or grievance email from the privacy policy]

Subject: Request for erasure of personal data under section 12 of the Digital Personal Data Protection Act, 2023. [Your name], [mobile number].

Dear Sir or Madam,

1. I am [your full name], the Data Principal. My mobile number is [number] and my email is [email]. You are the Data Fiduciary for my personal data held at [profile ID / listing URL / description].

2. Under section 12(1) of the Digital Personal Data Protection Act, 2023, I request erasure of all my personal data. Under section 6(4) I withdraw any consent I gave, and under section 6(6) processing must stop within a reasonable time after withdrawal. Section 8(7) requires you to erase personal data when consent is withdrawn or the purpose is served, unless a law requires retention.

3. I ask you to: a. Erase my account / profile / listing and every copy of my name, phone number, email, address, photographs, documents and other personal data, including backups within your retention cycle, except what a law in force requires you to keep. b. Cause every Data Processor and every third party you shared it with to erase it, as section 8(7) requires. c. Remove the public page at [URL] and request its removal from search engines. d. Tell me in writing what data you keep, under which law, and for how long. e. Confirm in writing when each of the above is done.

4. Please respond within the grievance period you have published under Rule 14 of the Digital Personal Data Protection Rules, 2025, which may not exceed ninety days, and within the Information Technology (Intermediary Guidelines) Rules timeline of 7 days where you are an intermediary.

5. If you do not respond within your published period, or refuse without a lawful reason, I will complain to the Data Protection Board of India under section 18 of the Act. Please note section 33 and the Schedule of the Act on penalties for non-compliance.

Yours faithfully, [Your name], Data Principal [Mobile] | [Email]

Attached: screenshot of the page or profile showing my data, dated [date].

Tips

- One email per company. One subject line that has your number in it, so their support tool finds it.
- Send from the email registered on the account where you can. If you cannot, attach a masked ID (first 8 Aadhaar digits covered, purpose and date written across it: nosus.foo/mask-aadhaar-copy).
- Do not attach an unmasked Aadhaar, PAN or passport to a company you are asking to hold less of your data.
- Do not threaten what you will not do. Version A is a request; it says so. Version B is a right; say it plainly.
- Section 15 of the DPDP Act puts a duty on you too: do not file a false or frivolous complaint. Attach the screenshot and keep to facts.
- Log the date sent and the reply date in Part 10.

Templates and steps, not legal advice.

Part 8. Escalation when a grievance officer ignores or refuses

Send this when Part 7 got no acknowledgement in 24 hours and no resolution in 7 days, or got a refusal with no reason. It goes to the same grievance officer, copied to the company's nodal contact and, where the route exists, to a regulator. Fill every [bracket]. Delete the box before sending.

Who to copy, by situation

Situation	Escalate to	Route	Type
Any site, grievance ignored for 7 days	Same grievance officer, subject "Second notice"; copy the company's legal or nodal email from the privacy policy	Email	Request
Site is a social media or large platform	Its Grievance Appellate Committee (GAC) at gac.gov.in, within 30 days of the grievance officer's reply or deadline	Online form	Request with a decision
Content is intimate, morphed or sexual	Part 9: cybercrime.gov.in, 1930, and the 2-hour rule	Portal	Request with a legal clock
Personal data misused for fraud or impersonation	cybercrime.gov.in; local police cyber cell	Portal, FIR	Request
Telecom company or telemarketer	TRAI DND app complaint; then the carrier's appellate authority; Sanchar Saathi Chakshu	App, portal	Request
A bank, NBFC or lender holding your data	Its grievance officer, then cms.rbi.org.in after 30 days	Portal	Request
After the DPDP duties commence (reported 13 May 2027)	Data Protection Board of India, section 18 complaint, after the fiduciary's published grievance period	Board's online portal (not live on 9 Nov 2026)	Right
Consumer harm (paid service refusing deletion)	consumerhelpline.gov.in (1915), then edaakhil.nic.in	Portal	Request

The GAC (Grievance Appellate Committees under Rule 3A of the IT Rules 2021) hears appeals against a grievance officer's decision on an intermediary. It is the one route today that gives a decision, not just a reply. File within 30 days of the grievance officer's response or of the deadline passing.

Second notice to the grievance officer

Date: [DD Month YYYY]

To, The Grievance Officer [Company legal name] Email: [grievance email] Copy: [nodal / legal email from the privacy policy]

Subject: SECOND NOTICE. Unresolved erasure request dated [date of Part 7 email]. [Your name], [mobile number].

Dear Sir or Madam,

1. On [date] I sent you a request to delete my personal data and account (copy attached). Rule 3(2)(a) of the Information Technology (Intermediary Guidelines and Digital Media Ethics Code) Rules, 2021, as amended in February 2026, requires your Grievance Officer to acknowledge a complaint within 24 hours and dispose of it within 7 days.
2. As of today, [day count] days later, I have received [no acknowledgement / an acknowledgement but no action / a refusal on [date] that gives no reason / a reply that does not address items (a) to (e)].
3. I repeat my request: delete my account, profile or listing and every copy of my personal data; stop sharing it; remove the page at [URL]; tell me what you retain and under which law; confirm in writing.
4. If this is not resolved within 7 days of this notice, I will: a. Appeal to the Grievance Appellate Committee at gac.gov.in under Rule 3A, attaching this correspondence. b. [If relevant:] File at cybercrime.gov.in / with [regulator], and c. Complain to the Data Protection Board of India under section 18 of the Digital Personal Data Protection Act, 2023, once the duties under that Act commence.
5. Please treat this as a formal grievance and quote a ticket number in your reply.

Yours faithfully, [Your name] [Mobile] | [Email]

Attached:

1. My request dated [date] (sent copy)
2. Your reply dated [date], if any
3. Screenshot of the page or profile, dated [date]

Filing at the GAC (gac.gov.in)

1. Open gac.gov.in, register with your mobile and email, choose the intermediary.
2. Paste the grievance officer's ticket number or, if none, the date you sent Part 7 and the date you sent this notice.
3. Upload the two emails and the screenshot.
4. The GAC's stated aim is to dispose of appeals within 30 days. Keep the appeal number.

What a refusal can legitimately say

- "We must keep this under [law] for [period]": tax law, the Companies Act, the IT Rules' 180-day log retention, PMLA for payment firms. Legitimate for records; not for your photo or your public listing.
- "We are not an intermediary": a directory that writes its own listings is a publisher, and the IT Rules grievance timeline may not bind it. Your request still rests on its privacy policy and, after commencement, on the DPDP Act.
- "The data came from a public source": not a reason under the DPDP Act once in force, except where the Act's section 3(c)(ii) exemption for data you made public yourself applies. Say in reply that you did not make it public.

Keep the timeline

#	Date	Action	To	Ticket or ref	Reply due
1	[date]	Part 7 sent	[company]	[ref]	+7 days: [date]
2	[date]	Second notice sent	[company]	[ref]	+7 days: [date]
3	[date]	GAC appeal filed	gac.gov.in	[appeal no.]	+30 days: [date]
4	[date]	[Regulator / police]			

Templates and steps, not legal advice.

Part 9. Intimate image removal

If a nude, semi-nude or sexual image or video of you, or one morphed to look like you, is online or being threatened, this page is the fast track. It is faster than the rest of the kit because the law gives it a clock. Do it in this order.

Summary

Step	Route	Type	Time
1. Save proof	Screenshot with URL and date		5 minutes
2. Hash the image so platforms block re-uploads	stopncii.org > Create your case	Instant (on your device)	15 minutes
3. Report on the platform	In-app report, "nudity or sexual activity", "it's me"	Request with a 2-hour legal clock	2 hours under the IT Rules
4. Report to the grievance officer in writing	Email, template below	Request, 2 hours	
5. Report to police	cybercrime.gov.in > Report women/children related crime (anonymous option) or 1930	Request	Same day
6. Remove from Google	support.google.com/websearch/answer/13650142	Request (priority queue)	Days
7. If ignored	GAC at gac.gov.in; Part 8	Request	30 days

The law, briefly

- Rule 3(2)(b) of the IT (Intermediary Guidelines and Digital Media Ethics Code) Rules, 2021 requires an intermediary to remove or disable access to content that shows a person's private area, full or partial nudity, a sexual act, or is an artificially morphed image of a person, within **2 hours** of a complaint by that person or someone on their behalf. The limit was 24 hours until the amendment notified on 10 February 2026 (G.S.R. 120(E)), in force from 20 February 2026.
- Section 66E of the IT Act 2000 (violation of privacy, capturing or publishing images of private areas) and section 67/67A (obscene and sexually explicit material) are the criminal provisions. Section 77 of the Bharatiya Nyaya Sanhita 2023 covers voyeurism. You do not need to quote them to the platform; the police complaint uses them.
- MeitY's October 2025 SOP on non-consensual intimate imagery tells platforms to act on the report itself, without a court order. You do not need a lawyer to start.

Step 1. Proof, then do not share it

Screenshot the post with the URL, account name, date and time visible. Save the URL in a note. Do not forward the image to anyone, including friends asking to "help report it". Each forward is a copy.

Step 2. StopNCII.org

1. Open **stopncii.org** on the phone or computer that has the image. Click Create your case.
2. Eligibility: you are the person in the image, you were 18 or older when it was taken and are over 18 now, you still have the image, and it shows you nude, semi-nude or in a sexual act. Under 18: use the Take It Down route linked from the same site, or go straight to cybercrime.gov.in.
3. The site makes a hash (a fingerprint) of the image on your device. The image is not uploaded. Only the hash goes to StopNCII and its partner platforms (Facebook, Instagram, Threads, TikTok, Reddit, Snap, Bumble, OnlyFans, Pornhub, Microsoft Bing and others; the current list is on its participating companies page).
4. Partners block matching uploads. Edited or cropped versions may not match, so also do Steps 3 to 6. Keep the case number.

Step 3. Report on the platform, in the app

Instagram or Facebook: on the post, three dots > Report > "Nudity or sexual activity" > "Involves me" or the closest option. Meta's help page says a reviewed and removed image is then added to its photo-matching so re-uploads are stopped on Instagram, Facebook and Messenger. Also report the account if it is threatening you or asking for money (sextortion).

X: Report post > "It displays a sensitive image" > "Intimate image shared without consent". Telegram: report the message and the channel; also email abuse@telegram.org with the link. WhatsApp: report the contact in-chat; WhatsApp cannot see content, so the police route matters more there. Other sites: find "Report" on the post, then the grievance email in the site's privacy policy for Step 4.

Step 4. Written complaint to the grievance officer (starts the 2-hour clock)

Send to the grievance email in the platform's privacy policy or "Grievance redressal" page. Fill every [bracket].

Date and time: [DD Month YYYY, HH:MM IST]

To, The Grievance Officer [Platform legal name] Email: [grievance email]

Subject: URGENT. Rule 3(2)(b) complaint. Non-consensual intimate image of me at [URL]. Remove within 2 hours.

Dear Sir or Madam,

1. I am [your full name]. I am the person shown in the content at: [URL 1] [URL 2] posted by account [username / profile URL].
2. The content shows [my private area / me nude or partially nude / me in a sexual act / an artificially morphed image made to look like me]. I did not consent to it being made or published.
3. Under Rule 3(2)(b) of the Information Technology (Intermediary Guidelines and Digital Media Ethics Code) Rules, 2021, as amended by G.S.R. 120(E) of 10 February 2026, you must remove or disable access to this content within 2 hours of receiving this complaint. This complaint is received at the date and time above.
4. Please also: remove every copy and re-upload; preserve the posting account's data for law enforcement; tell me the ticket number; and confirm removal by reply.
5. I have reported this to the police at cybercrime.gov.in, acknowledgement [number, or "being filed today"], and registered the image with StopNCII.org, case [number].

Yours faithfully, [Your name] [Mobile] | [Email]

Attached: screenshot of the content showing URL, account and time, dated [date]. (If you prefer not to attach the image, write "Screenshot available on request; URL above is live.")

Step 5. Police

cybercrime.gov.in > Report Women/Children Related Crime. You can file without giving your name. Give the URLs, the account, and the times. Note the acknowledgement number. If money is being demanded, call **1930** as well. The portal forwards to your state's cyber cell; an FIR can follow. A complaint number makes platforms move faster and is required for a court order if one is ever needed.

Step 6. Google

Open **support.google.com/websearch/answer/13650142** and follow "Request removal" for non-consensual explicit images. Google treats these as a priority. Give the URLs and the search terms that bring them up. Also use Results about you (Part 2) with your name so new copies are flagged.

Step 7. If the platform misses 2 hours

Send the Part 8 second notice with "Rule 3(2)(b)" in the subject, then appeal at **gac.gov.in** within 30 days. Attach the time-stamped complaint and the still-live URL. Under the 2026 amendment a platform that ignores Rule 3(2)(b) risks its safe-harbour protection, which is why written, time-stamped complaints work.

Support

This is a crime done to you. Talk to someone. iCall (TISS) 9152987821; Vandrevala Foundation 1860-2662-345 (24 hours); for women, the national helpline 181. The Red Dot Foundation and Social Media Matters have helped people through StopNCII in India.

Templates and steps, not legal advice.

Part 10. Monthly re-check checklist

Removals decay. A friend's new phone re-uploads your number. A directory re-imports an old database. Google re-indexes a page. Twenty minutes on the first of every month keeps the work done. Copy this table into a note or spreadsheet and tick it.

Name: [name] | **Numbers checked:** [number 1], [number 2] | **Emails checked:** [email 1], [email 2]

The monthly 20 minutes

Tick	Check	How	If it is back
[ ]	Truecaller shows my name	Ask a friend with the app to search my number, or search it in the app on a friend's phone	Unlist again at truecaller.com/unlisting (Part 1)
[ ]	Getcontact / Eyecon show my name	Same, via a friend's app	Unlist or email again (Part 1)
[ ]	Google: "[my name]"	Incognito search, first 3 pages	Results about you or the content removal form (Part 2)
[ ]	Google: "[my number]" and "[number without +91]"	Incognito search	Content removal form, "phone number" (Part 2)
[ ]	Google: "[my email]"	Incognito search	Content removal form (Part 2)
[ ]	Google Images: my name	images.google.com	Report the source page; outdated-content tool if deleted (Part 2)
[ ]	Results about you alerts	myactivity.google.com/results-about-you > To review	Request to remove each
[ ]	Justdial, Sulekha show my number	Search the number on each site	Opt-out form / email again (Part 4)
[ ]	Old matrimony or job profile reappeared	Search my name on the site, or log in	Delete again; send Part 7 with the old ticket number
[ ]	haveibeenpwned new breach	Email from Notify Me, or search	Change that password; close the account; Part 7
[ ]	TAFCOP: SIMs in my name	tafcop.sancharsaathi.gov.in	Report "not my number" (Part 6)
[ ]	Aadhaar authentication history	myaadhaar.uidai.gov.in	Write to the agency; help@uidai.gov.in (Part 6)

Tick	Check	How	If it is back
[ ]	Biometrics still locked	myaadhaar.uidai.gov.in > Lock/Unlock	Lock again
[ ]	DND still on	SMS STATUS to 1909 or check the TRAI DND app	START 0 to 1909 again
[ ]	New apps with contacts permission	Phone Settings > Permission manager > Contacts	Remove
[ ]	Sign in with Google list grew	myaccount.google.com/connections	Delete connection; Part 7 to the app

Open requests

Every Part 7 or Part 8 email you have sent and not closed. Check this list before the search, so you know what is pending.

Company	Sent (Part 7)	Ack received	Due (+7 days)	Second notice (Part 8)	GAC appeal	Closed on
[company]	[date]	[date / none]	[date]	[date / not yet]	[date / no]	[date]

Every quarter (add 15 minutes)

- ☐ Download a fresh copy of what Facebook, Instagram and Google hold on you, and look at "Off-Meta activity" and "Ad topics" for companies you did not expect.
- ☐ Re-read the privacy policy of any site you still use for a new "grievance officer" email; they change.
- ☐ Rotate your Aadhaar VID.
- ☐ Check the DPDP commencement date. After the duties commence (reported as 13 May 2027), switch to Version B of Part 7 for every new request and re-send it to any company that refused Version A.

When to stop checking a site

Three clean months in a row, and the site has sent written confirmation of deletion. Keep the confirmation email. Move the row to a "done" list; do not delete it, because a reappearance with the old ticket number is the fastest second notice you will ever write.

Templates and steps, not legal advice.
